Photoelectric

Direct Wire/Battery (AC/DC)

Photoelectric alarms are generally more effective at detecting slow, smoldering fires which smolder for hours before bursting into flame. Sources of these fires may include cigarettes burning in couches or bedding.

Features

- **Advanced Photoelectric Design** - well suited for kitchens and near baths, less susceptible to nuisance alarms caused by cooking or high humidity
- **Two Separate Lighted LED's** - constant green confirms AC power is present, flashing red displays alarm/battery status
- **Quick Connect™ Wiring Harness** - easy to replace or move alarms quickly
- **Easy Interconnection** - compatible with other contractor-preferred FireX smoke, heat, carbon monoxide and smoke/CO combo alarms *
- **Dust Cover** - protects sensors from dust, dirt, fumes or other common contaminant's during construction, reducing false alarms and callbacks
- **9 Volt Battery Back-Up** (battery included) - provides added protection in the event of a power failure
